

# South East Scanning

is recognised as a Certified Locating Organisation (CLO)

This Certified Locating Organisation (CLO) complies with the following standards to gain access to Telstra pits and manholes for cable and plant location and other utility assets:

- > They employ CERTLOC Certified Locators who can identify subsurface assets on site, having passed rigorous industry theoretical and practical assessments. They have a proven understanding of electromagnetic field (EMF) detection of buried conductive assets and other equipment and technologies for the location of non-conductive assets and the Australian Standard 5488 – Classification of Subsurface Utility Information.
- > They use compliant and calibrated EMF location and gas detection equipment.
- > They use appropriate safety equipment, processes and PPE to identify and deal with unsafe conditions.
- > They carry business insurance appropriate to plant location work for the protection of their clients, infrastructure, and business.

A handwritten signature in black ink, appearing to read 'Robert Row', positioned above a horizontal line.
